Founded in 1909 as a company producing agricultural machinery. Over the years, it expanded the product range, so that the operation was divided into different categories. The distribution network extended across Europe, overseas and the Eastern European countries. After many changes and restructurings during the following years the company NEUERO Farm- und Fördertechnik GmbH was founded in the year 1988. The company presents itself as a reliable, professional partner for farmers, the grain trade, grain processing plants and for the wood processing industry.

New shipping warehouses

Trucks loaded in the
shipping area

From the single component to the complex system

With our staff of over 70 qualified employees and a production, storage and dispatch area of over 18,000 sqm we have the possibility to offer the planning, production, delivery and assembly of our systems.

By constructing and producing on our own we can flexibly react to your requests. We stand for innovative solutions, planning and modernization of your system.

Your requirements determine the way

Consulting and planning

Your requirements count! Our professional team is at your disposal for individual planning of your system. After consultation and thorough analysis of your requirements we work out a custom-made solution. You can count on our employees in the field and in the company if you require a professional and practical consultation.

Do you have special wishes? We like to submit an offer to you!

Development & construction

NEUERO has long-standing experience and competence in plant construction for grain storage

and conveyance. We conceive systems of all divisions of our product range for you from the individual conveyor up to the complex system. Our enterprise has honored innovation and quality for many years. Modern 3D-CAD Construction as well as permanent quality control and further development of our series products and special constructions assure a high technical and economic standard.

Production

A high degree of in-house production assures a short-term availability for you. With modern processing machines we produce with large vertical range of manufacture at different locations. Because of our high flexibility we can react to your requirements fast and at short notice. Individual solutions are promptly realisable by our motivated and competent employees.

Service

In case of need we do not leave you alone. Experienced, qualified and motivated service employees will help you even outside the usual business hours. Thanks to our own production, we are able to deliver spare, component or exchange parts fast and reliably.
